

## WELCOME TO YYACHTS

We are specialized in crafting light and fast sailing yachts, focusing on simplicity in engineering and design. Our yachts, ranging from 60 to 100 feet, are built with a **carbon hull, deck as well as masts**, ensuring they are lightweight and strong.

And we are focused that a sailing yacht must be intuitively and simple to use, also easy to manage for perfect owner-driven experience. With designs from the world's top architects and the commitment to quality expected of a German shipyard, we offer the luxury and comfort unique to high-end yachts.

## THE ART OF SIMPLICITY

SIMPLIFIED TO  
PERFECTION

*Our team constantly asks: How can we improve things? What do we truly need on board? How can we simplify the yacht so that it feels intuitive to use? A yacht should feel natural to operate – not complicated.*

*We want owners to have real choices – not just options.*

*Beyond that, we are all individuals, and it's important to live in surroundings that reflect our personal taste and make us feel at home. That's why the Y6 offers 13 different layouts and four distinct interior design styles – empowering every owner to shape a yacht that truly reflects their vision.*

## SAILING IS A WAY OF LIFE

*The world is getting smaller, and finding truly individual, secluded places is becoming increasingly difficult.*

*Often, you reach these special places by boat – and it becomes even more exciting with a sailboat. Sailing defines your lifestyle and reflects what you stand for.*

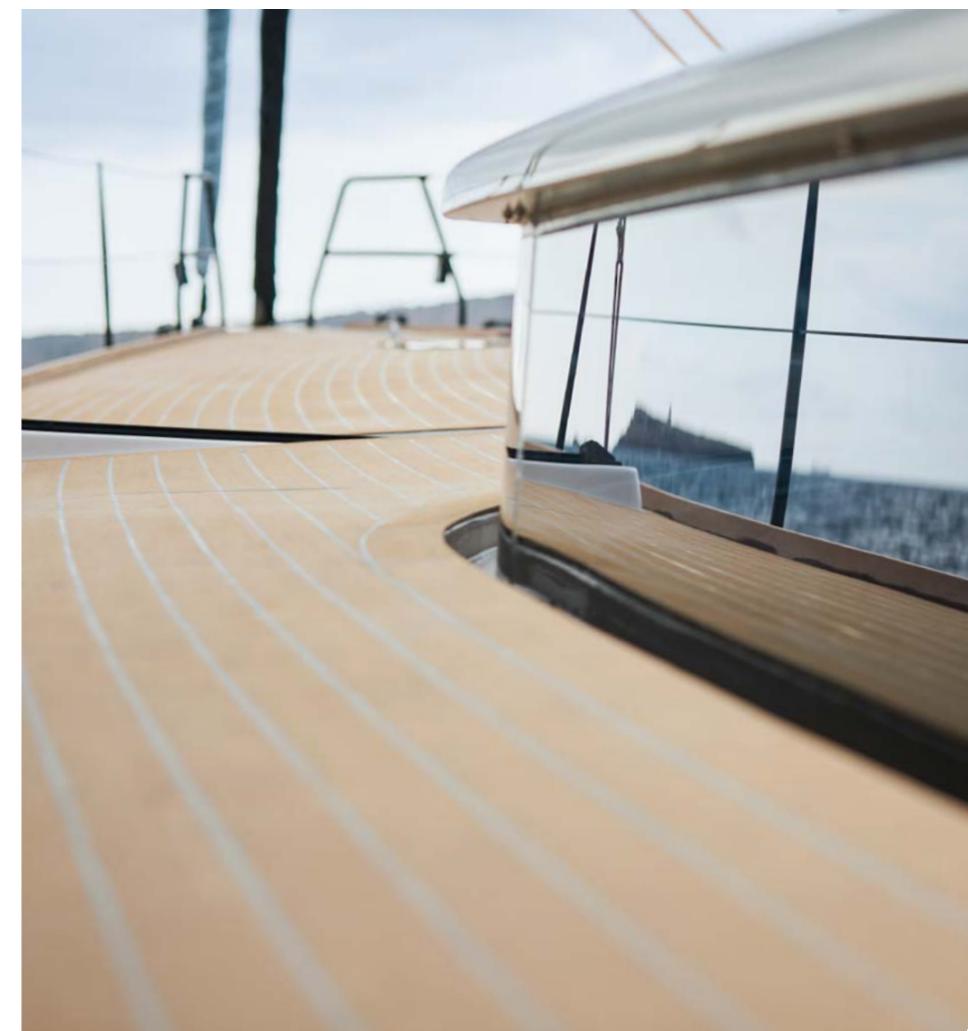

*With the new Y6, we set out to create a yacht that is easy to handle while still delivering the full joy of sailing. For me, it's essential to have a yacht that performs well in light winds, yet remains safe and simple to manage in 40 knots of breeze.*

**Michael Schmidt** Founder YYachts

Our new Y6 model is the result responding to our customer demand for maximum privacy and easy handling. World-renowned yacht designer Bill Tripp created a yacht that can be sailed solo or as a couple, with no compromise on style or performance to enjoy the freedom of solo sailing without sacrificing the luxury of a true superyacht. The design and configuration reflect that philosophy – and the Y6 offers the most versatile layout options in its class. Built from advanced carbon epoxy, the nearly 20-meter Y6 delivers superior strength and lightweight performance, allowing it to sail even in light wind conditions – a hallmark of the YYachts fleet. Carbon epoxy construction also ensures a fresh, odor-free interior environment, setting the Y6 apart from conventionally built yachts.

## INTRODUCING THE NEW Y6

## ESSENCE OF ALL EXPERIENCE

At YYachts, we ensure that every yacht is meticulously engineered before the production process starts, guaranteeing the highest standard of construction quality. Our team, boasting decades of experience in yacht building, commits to delivering only the finest vessels. We operate under a clear and straightforward philosophy: we love sailboats. That's why we build them and nothing else.

All halyards and sheets on the Y6 run aft to the wheel pedestals. We keep an eye on every detail to ensure the easy and safe handling. Her good ballast ratio keeps her very stable, so that a Y6 is extremely pleasant to sail.

The furling system, anchor and wheel pedestals are elegantly integrated into the exterior look created by Bill Tripp.

One engine and a bow thruster allow stress-free maneuvering, even in tight marinas, making the Y6 surprisingly easy to handle. On deck, YYachts uses synthetic teak which is long lasting, light and eco-friendly.

ELEGANCE  
AT ITS FINEST

## THE REFINED ESSENCE OF SCANDINAVIAN LUXURY

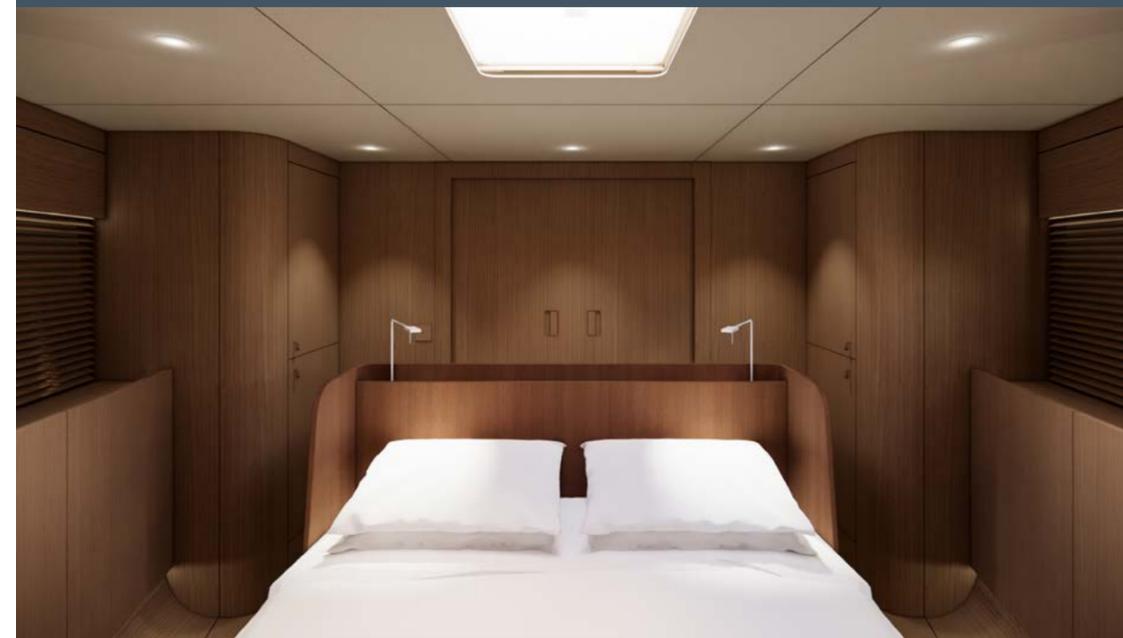

Baltic features a warm, natural colour palette: soft sand and beige tones are combined with light matte wood and cream-coloured upholstery. The colour scheme is deliberately subtle and timeless – conveying a sense of calm, elegance, and Nordic clarity that makes you feel at home.

The owner's cabin features a free-standing bed, two large hanging lockers and an en-suite bathroom in the bow. The spacious entrance from the salon to the master cabin is designed with innovative sliding doors.

With the new Y6, we continue our commitment to modern aesthetics, clean lines, and maximum comfort at sea. For the interior, we once again collaborated with renowned Danish architect David Thulstrup – whose distinctive design language already shaped the Y8.

Thulstrup's minimalist style, marked by Scandinavian clarity and emotional depth, gives the Y6 a sense of calm and warmth. Natural materials, soft beige and brown tones, and finely crafted wood elements create an atmosphere that is both sophisticated, functional, and inviting.

The four interior concepts of the new Y6 are a creative collaboration between the YYachts Design Team, led by our Italian Head of Design, Francesca Modica, and David Thulstrup. This fusion of Mediterranean sophistication and Nordic clarity has shaped a bold and timeless design language, recognised with numerous international design awards. Each concept offers a distinct atmosphere, defined by refined colour palettes and thoughtfully selected, high-quality materials. Every Y6 interior is crafted in close dialogue with the owner and features a curated range of finishes, such as oak or mahogany wood, complemented by an exquisite selection of luxurious fabrics.

BALTIC . MILANO . SUGI BAN . GLACIER

## CURATED INTERIOR, TAILORED CHARACTER

Francesca Modica Head of Design YYachts

*The interior of the Y6 is crafted for people with exceptional taste – individuals who know exactly what they want.*

*Design is more than aesthetics, it's about identity.*

*With the four new concepts, we're enabling maximum personalisation without compromising our clear and distinctive design language. Each concept expresses its own character – from minimalist and modern to warm and inviting.*

Milano embraces warm elegance: rich earth tones, soft caramel, and warm greys are combined with brushed oak and subtle bronze accents. The colour scheme creates a refined, contemporary atmosphere – stylish and inviting, with a touch of cosmopolitan sophistication.

## MILANO

## SUGI BAN

Sugi Ban plays with contrast and depth: dark, charred wood surfaces meet soft taupe, warm greys and textured fabrics. Inspired by the Japanese technique of wood preservation, the look is bold yet balanced – a sophisticated interplay of shadow and light.

## GLACIER

Glacier is characterised by cool, subtle tones: soft neutrals and pale shades are combined with light oak and matte finishes. The colour palette feels calm and airy – inspired by Nordic clarity and a sense of quiet, understated elegance.

# UNIQUELY CUSTOMIZED LIKE NO OTHER

There are numerous of individual options for a layout of a Y6 below deck.

The standard layout: The owner's cabin is located forward and features a free-standing bed, two large hanging lockers, and an en-suite bathroom in the bow. The lower salon includes a U galley on starboard-side, and opposite of the galley is a relaxation area with an L-shaped sofa. **In the center of the salon, there is a dining area for six people to port and a comfortable lounge sofa to starboard.** Aft, there are two twin guest cabins, each with its own en-suite bathroom.
